

What do we (the customer) need to do before installation?

- We ask that you mark your pool site. Use can of spray paint in bright color.

For Round Pools:

- **X** for the approximate center of the pool
- **F** for where you would like the filter located (this should NOT be under the deck)
- **D** for where our crew may place the dirt excavated from the site (**NOT OVER 15'-20' AWAY**)

For Oval Pools:

- Place 4 X's one for each "corner" of the pool. You will mark 2 X's at each rounded end.
- **F** for filter. Filters must be placed at one of the rounded ends of the pool, NOT on the straight wall of the pool. Filters should NOT be placed under decking
- **D** for where you want the dirt excavated from the site to go. NO MORE than 15'-20' away.
- Provide crew with access to a garden hose that reaches to the center of the pool site.
- Provide an electrical outlet.
- If you need to have water hauled in, we can assist or arrange it for you.

THE COST OF WATER MUST BE PAID DIRECTLY TO THE WATER HAULER AT THE TIME OF DELIVERY.

CALL BEFORE YOU DIG! YOUR UTILITY PROVIDER MUST MARK ANY UNDERGROUND LINES BEFORE WE SHOW UP TO DIG. THIS MAY TAKE A WEEK OR MORE BEFORE THEY CAN SEND SOMEONE OUT. CALL AHEAD!
